ASRITHA VINDYALA

Data Analyst | Business Analyst |Product Analyst
Poughkeepsie, NY | 845-318-8168| Asritha.Vindyala1@marist.edu| LinkedIn

PROFESSIONAL SUMMARY

Data-driven analytics professional experienced in transforming operational and business data into measurable performance improvements. Proficient in SQL, Python, Excel, and Tableau, with expertise in KPI design, dashboard development, and performance analysis. Demonstrated ability to identify trends, optimise processes, and deliver actionable insights that support strategic decision-making.

SKILLS

Data Analysis & Visualisation: Python, Tableau, Power BI, Advanced Excel (Pivot Tables, VBA, Macros, Lookups, Power Query, Dashboards), Google Analytics, QlikView, Looker Studio, Ad-hoc Analysis, Adobe Analytics
Database Management: SQL, Mongo DB(Basics), Snowflake (Basics)
Business Intelligence & Analytics: Data Mining, Statistical Modelling, Marketing Analytics, Web Analytics, ERP
Tools & Methodologies: GitHub, Jupiter Notebook, Google Colab, VS Code, PyCharm, JIRA, Visual Studio, Requirement Gathering, MS Project, MS Visio, SharePoint, Slack, TDX

PROFESSIONAL EXPERIENCE

Marist University Data Centre | Poughkeepsie, NY
System Operations Specialist **Aug 2024 – Present**

- Collected, cleaned, and consolidated multi-month server temperature and infrastructure data into a centralised dataset to enable structured analysis and reporting.
- Performed operational data analysis on server temperature metrics and system alerts, identifying trends and threshold deviations to improve incident response efficiency by **25%**.
- Designed and developed an interactive Excel dashboard using Pivot Tables, charts, and slicers to track KPIs, including average vs. maximum temperatures, alert frequency, and uptime stability, increasing operational visibility by **40%**.
- Conducted trend analysis on recurring alerts to reduce repeated infrastructure issues by **18%** through proactive monitoring.
- Performed data validation and cleansing to ensure data integrity and reporting accuracy, improving audit readiness by **30%**.
- Monitored daily backup processes and analysed system logs using the TDX ticketing system to identify temperature deviations and raise incident tickets, reducing discrepancies by **20%**.
- Standardized reporting workflows and tracking templates, reducing manual monitoring efforts by **35%**.
- Designed and maintained a structured asset inventory dataset for **70+ UPS systems**, capturing key attributes such as model, IP address, configuration status, and location to support monitoring and documentation

ACADEMIC PROJECTS

Vrinda Super Store Sales Dashboard | Microsoft Excel
Tools: Excel (Advanced), Pivot Tables, Charts, Slicers

- Built an interactive sales dashboard to analyze revenue performance across time, product categories, customer segments, regions, and sales channels.
- Enabled dynamic filtering using pivot tables and calculated fields to support comparative performance analysis and business insight generation.

Electric Vehicle (EV) Market Analysis Dashboard | Tableau
Tools: Tableau, Data Visualization, Geospatial Analysis

- Designed a Tableau dashboard analyzing 143K+ EV records to evaluate adoption trends by model year, state, manufacturer, and EV type (BEV vs PHEV).
- Developed KPI indicators, trend lines, and geospatial maps to communicate market growth and regional distribution insights.

Hospital Management System
Tools: SQL

- Designed a relational database with 7 structured tables to manage hospital operations and ensure data integrity.Determined best customers, top cities, and most popular genres.
- Used advanced SQL queries with joins, subqueries, and aggregations to generate insights

Active Face Spoofing Detection | Python
Tools: Python, OpenCV, YOLO

- Developed a liveness detection system using object detection and image distortion analysis to differentiate real vs spoofed facial inputs.
- Enhanced recognition reliability through real-time image processing techniques.

EDUCATION

Marist College, Poughkeepsie, NY **Aug 2024 – May 2026**
Master of Science in Information Systems **CGPA: 3.7/4**
Relevant Coursework: Database Management Systems, Data Mining, Statistical Analysis & Visualisation, Project Management

Sreenidhi Institute of Science and Technology, Hyderabad, India **Aug 2020 – Aug 2024**
Bachelor of Technology in Electronics & Communication Engineering **CGPA: 3.2/4**

CERTIFICATIONS

SQL Server (Itronix); AWS Data Science (Machine Learning & Data Analysis); Data Science with Python (Coincent); Palo Alto Networks Cybersecurity (AICTE)
